## Introduction

This conditionals board game is perfect for reviewing the zero, first, second and third conditionals. In the game, students race to complete mixed conditional sentences and ask or answer conditional questions in a ten-second time frame.

## Procedure

Divide the students into groups of three or four.

Give each group a copy of the game board, a dice and counters.

Have one student keep the time in each group.

Students place their counters on the start square.

Students then take it in turns to roll the dice and move their counter along the board.

When a student lands on a square, they have ten seconds to make a conditional sentence using the clause in the square or ask or answer a conditional question.

If a student can't think of anything to say, makes a grammar mistake, or doesn't complete the task within ten seconds, they move back two squares.

The first student to reach the finish wins the game.

You can make the game easier or harder by changing the time limit. You could also have the students miss a turn instead of going back to their previous square if they don't complete the task.
