

## Activity Type

Vocabulary Game:  
matching (group work)

## Focus

Travel collocations

## Aim

To match words together  
to make collocations  
related to travel.

## Preparation

Make one copy of the  
dominoes for each group  
of three and cut as  
indicated.

## Level

Intermediate (B1)

## Time

20 minutes

## Introduction

In this travel collocations game, students play dominoes by matching words together to make collocations related to travel.

## Procedure

Divide the students into groups of three.

Give each group a set of dominoes. Ask the students to shuffle the dominoes and deal out six each, leaving the rest in a pile face down.

Ask the students to turn over the top domino from the pile and place it face up on the desk.

The first player puts down one of their dominoes on either side of the domino on the table, making sure that the words match together to make a travel collocation, e.g. check-in desk.

If a player cannot put down one of their dominoes, they take one from the top of the pile and put it down if they can.

The other players then take it in turns to match their dominoes in the same way by putting them down at either end of the domino chain.

If a player cannot go and there are no dominoes left in the pile, play passes to the next student. If another player thinks a travel collocation is wrong, he or she can challenge the player. If the collocation is wrong, the player must take back the domino and play passes to the next student.

The first player to get rid of all their dominoes wins the game.

The remaining players continue putting down their dominoes until all the dominoes have been placed in a chain.

Check each group has placed their dominoes correctly. If the students haven't matched the dominoes correctly, they should look for the mistake. The correct answers appear on the uncut worksheet.

Students can also play the game using a points system. Each time a student makes a travel collocation, they score one point. The student then tries to make a suitable sentence using the collocation for an extra point. The first student to get rid of all their dominoes receives an extra five points. The student with the most points at the end of the game wins.
